

TSE Region 4 Meeting Minutes 5/13/2015

Meeting Information	Date	5/13/2015	Time	1400-1600	Location	North Canyon Medical Center
	Project	TSE Monthly Meeting				
	Meeting Leader	Kevin Kraal, MD				
	Meeting Facilitator	Brandy Bartholomew	Scribe	Brandy Bartholomew		
TOPIC		DISCUSSION/RECOMMENDATIONS				ACTION ITEMS/ ASSIGNMENTS
Meeting Minutes		Approve Minutes & Discuss Voting Member List to ensure correctness Kent Holyoak motioned to accept the meeting minutes from last month & Tom Mortimer second the motion. The meeting minutes were accepted.				Meeting minutes approved by all.

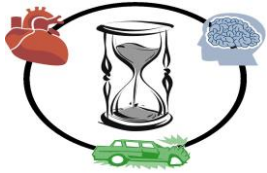

TSE Region 4 Meeting Minutes 5/13/2015

<p>TSE State Level Update</p>	<p>Kevin Kraal-The State TSE finalized criteria for a Level 1 Stroke Center @ SLMVRMC. "BANDS FOR TRAUMA" was a topic discussed at the state level. After discussion with the group, this group likes the concept of the Trauma Bands.</p> <p>Christian-States there is a discrepancy/confusion between the hospital leveling and patient leveling. His suggestion is that the group decides how we would like to differentiate between the two. The group decided on "Leveling the patient" and "Designating the facility" with Shelly McFarland's suggestion of such.</p> <p>Tom Mortimer-Questions if there is a "state wide" leveling criteria in place. The group wants to utilize that one level criteria so everyone is using the same criteria for all patients.</p> <p>Kevin Kraal-went through the current criteria that the state has. We looked at Level 1,2, & 3. The question that was asked was "does a level 2 go to a critical care access center"?</p> <p>Wendy Mohr-talked about the proximity of the patient to the facility and critical care access centers. Kraal-acknowledged the concern and wondered if we reassess at the one year mark and see where things are.</p> <p>Wendy Mohr-fearful that with her facility losing those patients what it will do to them financially.</p> <p>MiKe McGrane-states that it is more of a regionalization of where the patient will go...it's a developing thought that will take some time.</p> <p>Tom Mortimer-thought that as long as the hunt for ALS or the next level of care was in consideration from the beginning things will work themselves out over time.</p> <p>Shelly-Data per facility can be accessed since 2007-2013 and possibly may have 2014 information downloaded at this time. The real need is data to be interpreted. Shelly has cards to give out to the group with the contact at the state to get data information. Shelly talked about the AIS score and the ISS score and what the numbers meant. These numbers will allow the data to be pulled and see what may need to change to better patient outcomes. There are 119 data points that can be pulled from the state information. Shelly has offered to help individuals access their data from the state. Kraal-Can we get all facilities to give buy in on the gathering data</p> <p>Kraal-back to the Leveling Criteria...we need to have MD input from each hospital and determine that this works for the facility. Kraal will "walk through" the process with the MD's</p>	<p>Will continue to get state updates at each meeting. 5/13/2015: Update discussed-Trauma Leveling & Data information</p>
-------------------------------	--	---

TSE Region 4 Meeting Minutes 5/13/2015

Education	<p>Tom Mortimer: PPT was shared with the group; Kraal-all facilities are currently “drip and ship” except for Jerome. Minidoka has a call in for a CT. Mark-advanced notification to ensure CT is in house pre activation. “Does the group agree with the 24 CT capabilities”...The group agreed they need to have CT. Lanny would like to have advanced warning from EMS to ensure the table is ready for the incoming possible “Code CVA”. The slide with the designated Stroke centers there is an addition to address Minidoka. TRAUMA: align with the state criteria. What facility can handle what trauma? Mechanism rated-two tiered vs three tiered...once leveled where do they go? Input was given on possible designation levels for the facilities in our region. STEMI: Wendy-asked about POC Troponin. Tom talked about smart phone apps with lead capability. Minidoka will be able to transmit 12 leads with their monitors. Mark talked about the process they have in place and are working towards. Lara-update on infield 12 leads in that area. She believes within the year. Kraal-would like a “sub-committee” to address the needs of the region to meet 12 leads TSE MINDSET: Get the information out to the community once completed. Nicole’s message in regards to CT needing to be completed within 20 minutes of patient arrival and 45 minutes interpretation. Ann Fullmer-The question clarifying Level activation fees can only come from pre-hospital vs a walk-in. Kraal clarified that the co</p>	<p>4/1: Proposed PPT to show group next meeting. Group will continue to meet until complete.</p> <p>4/1: Provide update to committee 5/13/2015:presented PPT 5/13/2015: Subcommittee needed for STEMI equipment</p>
Protocols		<p>4/1: Protocols will fall into place once data and parameters are set.</p>
Communication	<p>Kathy Elwell: SIRCOMM is EMD certified...they were not clear on the LKW time. TF City reroutes to SIRCOMM. Blaine County-EMD yes...did not specify the LKW; Sheriffs offices are not EMD certified; Cassia nor Minidoka are EMD certified. Mark Phillips states that they met resistance in regards to the EMD cert in the dispatch center. Kraal states we should be important. Scott Baggett feels it is a disservice to our communities and families not having it. Kathy Elwell-suggests education to the dispatch centers and given them the education to get them up to speed with questions to be asked@@@ Lara- states the Blaine county has been amazing about gathering the pertinent information to give the EMS agencies.</p>	<p>4/1: Kathy will follow up with dispatch information.</p> <p>4/1: Frequencies to Lara.</p>

TSE Region 4 Meeting Minutes 5/13/2015

Data	<p>Shelly McFarland: Shared with the group earlier. See earlier notes. Please get with Shelly to work together to gather data. Kraal-wants to move towards QA committee to address data. Help from the TSE group. Gather the data and see where we are at a baseline. 2 aspects...monitor critical events (death) or outliers like how long was the patient sitting in an ER, Chart review for the region, and open to ideas of what to do to improve. Maria talked about the U of U review that is beneficial as a system process, not an individual process. This will provide educational opportunities to take back to the community. Dewayne Woodridge, Gooding EMS-gave feedback on what the medical director with NCMC does with the agencies involved in the patients care from pre-hospital through care within the hospital. Wendy suggests we bring this as a TSE group education. This will benefit the region to improve. Shelly-suggests we set some region goals. The outcomes can be looked at from that standpoint. Also we need protocols in place. How will we do this? Volunteer cases, bring cases each month, or other examples, or does the information come from the state? Shelly-we may need to be quarterly depending on the state information data process. Wendy-would like to have quantitative points to</p> <p>Tom-scene times, figure out what the goals are per area, and &&&&& Kraal-lets pick a few easier data points to gather. Start small and go from there-start with the outlying cases and go from there. Maria-need to utilize tangible data. Shelly-notify agencies that there will be a QA process starting. This can be met by a letter or such. Go to the facilities and provide the education of what will be Lanny Campbell-suggests we look at what other regions in Idaho do for data collection. He would like quick feedback in order to improve or if the patient did great. Kraal stated the "quick feedback" will not be coming through the TSE group. SUBCOMMITTEES GO HERE....</p> <p>Kraal-Case review committee be "this group" Christian-discussed the other regions direction. Christian states that we can proceed however wanted. Will provide vetted documents once available on the website.</p>	4/1: Update
Maps	Brandy Bartholomew: didn't discuss	
Pediatrician	Kraal- Mitchell Moffit will be getting back to Kraal to determine his involvement.	4/1: Have a pediatrician named.
LZ's	Didn't discuss	
Roundtable	Hospital Questions..... Shelly suggestion-next meeting break up into committee Mike-kudos to the team for the work done at this regional group. Lara-requests frequencies	4/1: QA subcommittee & data & grant person.

TSE Region 4 Meeting Minutes 5/13/2015

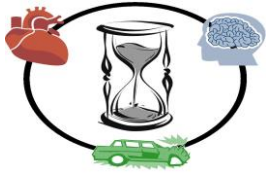

Motion to end the meeting	The meeting was motioned to be adjourned and seconded.	
Next meeting	June 3rd 1400-1600 @ Public Health Department 1020 Washington Street North Public Health Department	Tami has room reserved.
30 minutes	Tom-STEMI Scott- CVA Shelly- TRAUMA (20 30 minutes in the beginning of meeting)	
30 minutes	CASE REVIEW: Minidoka, SLMVRMC, & Tom	

Participants	Name/Department	Present	Absent	Name/Department	Present	Absent
	Kevin Kraal, MD/TSE Chair/SLMVRMC/ASL	x		Tami Pearson/Public Health Department	x
